

THREATENED AND ENDANGERED SPECIES
KNOWN OR LIKELY TO OCCUR
IN
DONIPHAN COUNTY, KANSAS

American Burying Beetle (*Nicrophorus americanus*) - Endangered: Known to occur historically. May still occur in suitable grasslands and upland woodlands. Endangered nationally.

Bald Eagle (*Haliaeetus leucocephalus*) - Threatened: Known to occur as a regular winter resident along the Missouri River. Prefers mature riparian woodland along the river. *Critical habitat has been designated.* Threatened nationally.

Chestnut Lamprey (*Ichthyomyzon castaneus*) - Threatened: Known to occur in the Missouri River main stem. Spawns over clean gravel in small tributary streams. Spawning has not been documented in Kansas. *Critical habitat has been designated.*

Eastern Spotted Skunk (*Spilogale putorius interrupta*) - Threatened: May occur in suitable habitat. Prefers brushy grasslands and woodland edges. May also use abandoned or little used farm buildings.

Eskimo Curlew (*Numenius borealis*) - Endangered: Formerly a regular spring transient using bare fields and heavily grazed or burned grasslands. Has not been recorded in Kansas since 1902. A few birds may still migrate through the state. Endangered nationally.

Flathead Chub (*Platygobio gracilis*) - Threatened: May occur in the Missouri River main stem. Prefers turbid streams with unstable sand bottoms. *Critical habitat has been designated.*

Least Tern (*Sterna antillarum*) - Endangered: Known to occur as an occasional seasonal transient or summer visitant at waters where forage fish are abundant. Endangered nationally.

Pallid Sturgeon (*Scaphirhynchus albus*) - Endangered: Known to occur in the Missouri River main stem. Prefers swift turbid rivers with firm sand substrate. *Critical habitat has been designated.* Endangered nationally.

Peregrine Falcon (*Falco peregrinus*) - Endangered: May occur as an uncommon seasonal transient or winter visitant at areas where waterfowl concentrate.

Piping Plover (*Charadrius melodus*) - Threatened: May occur as a rare seasonal transient at sparsely vegetated shores of streams, marshes, or impoundments. Threatened nationally.

Doniphan Co. Threatened & Endangered Species - Page 2

Sicklefin Chub (*Macrhybopsis meeki*) - Endangered: Known to occur in the Missouri River main stem. Prefers areas of strong current over sand or gravel substrate. *Critical habitat has been designated.* Federal candidate.

Silverband Shiner (*Notropis shumardi*) - Threatened: May occur in the Missouri River main stem. Prefers moderately deep areas of flowing water over sand or gravel substrate. *Critical habitat has been designated.*

Smooth Earth Snake (*Virginia valeriae elegans*) - Threatened: May occur in suitable habitat. Prefers rocky hillsides in or near moist woodlands where rocks, logs, or leaf litter provide cover.

Snowy Plover (*Charadrius alexandrinus*) - Threatened: May occur as an occasional seasonal transient or summer visitant at sparsely vegetated wetlands and impoundment shorelines.

Sturgeon Chub (*Macrhybopsis gelida*) - Threatened: Restricted to larger sandy rivers where they frequent areas swept by currents especially at heads of islands and sandbars. Known to occur in the Missouri River. *Critical habitat has been designated.* Federal candidate.

Western Silvery Minnow (*Hybognathus argyritis*) - Threatened: Prefers large shallow sandy rivers where it utilizes runs and backwater pools. Historically occurred in Missouri River and in Kansas Rivers, particularly downstream from Lawrence. Currently known only from the Missouri River. *Critical habitat has been designated.*

White-faced Ibis (*Plegadis chihi*) - Threatened: May occur as an occasional seasonal transient or summer visitant at wetlands and impoundments.
